AMERICAN TELEGRAPH

From the New York Tribune. A SISTER'S MEMORY. Once again the leaves of Summer
O'er the earth's cold breast are strewn,
And across my heart the chadow
Of another loss is thrown:
Gently her sweet spirit faded
As the Autumn days came on—
Days that now are gone forever—
They are gone, and she is gone!

And perchance ere next Spring's be.
Shed their persume on the air,
Cold in death's subreaking quiet,
I, like them, may slumber there.

Wherefore should we wish to linger In a barren world like this? Wherefore shrink to pass the gateway Leading to immortal bliss?—

Teach, O teach me, Heavenly Father!
So to live that Death may seem,
Whene'er he comes, a kindly angel,
Sent to wake me from a dream—
A dream from which, with clearer vision,
Waking, I again shall see
Her for whom these tears are streaming—
Who, perchance, how weops for me!
R. S. Chille
ROTON, D. C., November, 1850.

WASHINGTON, D. C., November, 1850. The Cumberland Region.

The Cumberland Region.
GRANTSVILLE, ALLEGANY Co., MD., August 8, 1851.

To the Editors of the American Telegraph.
GENTLEMEN: I greet from this mountain region your delightful little sheet, the American Telegraph. You know I left the metropolis on the 21st of last month. I had a delightful trip up the canal with my friend Cant. Rauben R. up the canal with my friend, Capt. Reuben R. Clark, of the steam tow-boat Virginia. We were six days in coming to Cumberland, but they were days of pleasure to me, for I found the captain one of the best of men, and his crew, seventeen in number, polite, accommodating, and clever. With such company, and the beautiful scenery of the Potomac, how could the beautiful scenery of the Potomac, how could I be otherwise than pleased. I stayed in Cumberland two days, which gave me an opportunity of viewing all the works connected with the Allegany coal trade, which is not yet one-tenth developed. With the improvements recommended by the talented engineer, Mr. Fisk, the canal will be able to accommodate a trade of a million of tons the season; and the advantages to this upper region by the return cargoes will be immense. The water was very low as we came up, which retarded us a good deal, having

came up, which retarded us a good deal, having five boats in tow. I could give you a description of all the beauties of art and nature that I saw on my journey, but it would occupy too much space. If you could only take time to come up the canal I know you would be pleased; and it costs so little. They have just started a packet line to run between Georgetown and Cumberland; fare through, with good boarding, \$4.10. When compared with the high charges of the Baltimore & Ohio Railroad to Washington, (\$8.20,) the canal is by far the most desirable route. I travelled leisurely up the National road to my destination on the Youghiogany river, which I reached last Sabbath, and spent the day in the pleasant village of Selbysport, where I attended a large Sabbath school in the morning and church in the afternoon.

church in the afternoon.

The Alleganians are now in the height of their hay and oat harvest, both of which are pretty good, notwithstanding the long drought they have had. It has been raining nearly a week, and we begin to wish it would clear away. We have now had a bountiful supply; indeed, county before, by even "the oldest inhabitant." It occurred last Saturday night week. I have seen its effects from Frostburg to Smithfield, in the prostration of trees, houses, and fences. I have heard of it as far as Uniontown, Pa. Kind Providence seems to have directed the "whirlwind and the storm" in this case to the preservation of life and limb, for I have not heard yet of any lives being lost. It followed pretty much the direction of the National road, first on the right and then on the left, leaving out the villages of Smithfield, Petersburg, Keyser's Ridge, Grantsville, Little Crossings, and Frostburg. I crossed over a portion of the tornado in coming from Selbysport to Keyser's Ridge the other day, and it was truly awful to look at. Almost every tree in a width of three-quarters of a

every tree in a width of three quarters of a mile was prostrate, and I had to climb over and m as I could. In that place I am sure it would take fifty men two or three days to clear out the road. There has been a great

destruction of valuable timber.

I will now say some little about the county I have come to take up my residence in. The lands are first-rate for all kinds of produce except corn, which does not grow so large or cept corn, which does not grow so large or abundantly as below the mountains; but it is fine for wheat, oats, rye, buckwheat, potatoes, and tobacco. We have the finest water in the world, and a plenty of it; you scarcely see a house without its fine spring near it, and running through a fine milk-house. Here, you may well imagine, we get the finest milk and butter. Indeed, we have every comfort here that the heart could wish; and the nights, oh! it is a luxury to sleep here. Sometimes we have to draw a blanket or two over us to make us warm enough to be comfortable. Then we have warm enough to be comfortable. Then we have such beautiful mountain scenery, such fine mountain trout and game, of all descriptions; and then we live so cheap: only think, with all these advantages, that you can board here, in any of the villages, for from one dollar and fifty cents to two dollars a week. I wonder that our city friends, instead of going to those costly fashionable watering-places, do not come up here and enjoy themselves. Indeed they can have the advantage of mineral water too for there is a first-rate mineral spring near Selbysport, equally as good in my judgment as any of the White Sulphur Springs in the county, and as easy of access. I wish you had time and as easy of access. I wish you had time to come up and judge for yourselves; you would be pleased, I know; and then the country would be benefited by your graphic pen. I had almost forgotten to tell you that when I arrived at Selbysport I found a large lot of your daily at the post office. It was a real treat to me. I read them over and over with great gusto. Yours, truly, H. A. B. Yours, truly,

THE CROPS.—The prospect of the crops throughout the United States is generally excellent. Of cotton there is little doubt that the yield will be very large; the lowest estimate at the South is now three million bales. There are complaints from some sections in regard to corn and tobacco, and it may be that these staples will fall somewhat short of an average. With these exceptions, every thing promises well.

THE CUBAN REVOLUTION .- The New York Commercial Advertiser thus sums up the late intelligence from Havana, brought by the steamer Georgia, at that port :

The information kindly prepared for the press by the purser of the Georgia shows, so far as it goes, the entire suppression of the insurgents. One sentence shows that we have not erred in our judgment of the matter, for it is expressly declared that "those who had raised the standard of liberty consisted of small parties acting without concert, and were easily put down by the troops." This faot is embodied in an account by no means hostile to the insurgents. We annex the substance of this account.

The government received some important news the night the Georgia arrived, which resulted in the sailing of all the fleet of war vessels in port, with the exception of the steamer Pizarro. This was effected in the most queit manner possible in the night of the 1st instant. It was rumored that an armed force was gath-The information kindly prepared for the press

manner possible in the might of the 1st instant. It was rumored that an armed force was gathering on the Florida reefs, and that a part of the fleet had been despatched in that quarter. Expresses were arriving every hour from the interior, but the officials kept every thing so quiet that it was impossible to learn the partiulars of the events.

The government paper had been printed two days, and is said to have contained some exciting news from the interior—but its issue was prohibited until after the departure of the American steamers. Several executions have taken place, and but for the refusal of one of the regiments to fine or the refusal of one of

taken place, and but for the refusal of one of the regiments to fire on the condemned, there would have been many more.

Pardon has been promised to all the insur-rectionists who lay down their arms, with the exception of the leaders, who will be executed or sent to Spain. Those who had raised the standard of liberty consisted of small parties, acting without concert, and were easily put down by the troops. It is said but few lives were spared among those found with arms in their hands, as they were killed on the spot. Government feels some anxiety with regard to the loyalty of the troops, as many regiments

Government feels some anxiety with regard to the loyalty of the troops, as many regiments are supposed to be disaffected. Many of the troops lately arrived from Spain have died from exposure, being unable to stand the climate. There was a report that an insurrection had been attempted in Matanzas, and troops had been ordered to march to that quarter. The result had not been heard when the Georgia sailed

sailed.

There may be some doubt about one or two things mentioned in this account, but they scarcely merit comment. Some anxiety was felt at Havana respecting the American sympatous the armed years. thizers; but as by this time the armed vess of the United States are acting in concert with Spanish cruizers, Lopez and his band, if they have sailed, will probably suffer for their teme-

Havana papers are to the 1st instant. The despatches from various parts of the island announce perfect tranquillity. The guerilla band at Puerto Principe was broken up, and the surrender of its remnant is confirmed, four members of its remnant is confirmed, four members only of it excepted, and these were seen on the way to Nuevitas, designing probably to escape from the island.

A despatch from the Governor of Nuevitas,

A despatch from the Governor of Nuevitas, dated the 21st of July, states that Augustin Aguero y Artega, Jose Augustin Aguero y Sanchex, and Miguel Aguero y Aguero, had presented themselves to the commissary of the town of Baza, soliciting pardon.

An official communication from the Commandate Country of the Country of t

dant General of the Centre, dated the 29th of July, relates the capture of seven of the princi-pal leaders of the revolt on the twenty-fourth, We have now had a bountiful supply; indeed, in one case, some of our people above and below us had a little too much, in the shape of a tornado, such as has never been seen in this county before, by even "the oldest inhabitant."

If occurred leaf Saturday wight and little their companions had surrendered; they were overtaken by the horsemen, however, and secured. The Commandant General of the Centre, Morales de Rada, congratulates the governor that this event terminates the pacifica-tion of the country. He commends in high terms the resolution and perseverance shown by the column who captured the chief of the insurrection, Aguero, after a long pursuit in various directions by day and night.

rious directions by day and night.

At Cienfuegos, a party of the patriots, closely
pressed, had left the horses they rode, and
sought refuge in a forest which the government troops had surrounded, so that escape was impossible. The bulletin of the 29th of July, in which this is announced, closes the account with saying that tranquillity is now perfectly secured in that part of Cuba as in every other

quarter of the island.

A letter from Puerto Principe, dated July 23, and published in Havana Diario de la Marina of the 30th of July, says: "The city appears like a hospital. There is scarcely a house in which there is not some member of the family confine to his bed, and in some all are sick, without even a domestic to attend him, and their friends cannot supply them with servants, since they are in the same condition themselves. Happily the epidemic is not fatal, especially in the case of adults, and runs its course rapidly."

Since the above was written, we have been floored by a commercial house in this city with the perusal of their correspondence from Matanzas, which is of the latest date. It gives assurance that the whole island of Cuba is now perfectly tranquil. The Spanish troops had behaved with great gallahtry, and maintaine behaved with great gallantry, and maintained the most perfect discipline in their operations against the guerillas, who were utterly routed and nearly all taken prisoners. The Govern-ment are said to treat their captives with clemency, rather than with rigor.

The foregoing accounts are derived from sources unfriendly to the Cubans, and we do not altogether rely upon them. Counter statements are made by the friends of the revolutionary party, and many of them are published in the morning papers. The next arrival will determine the truth of what has been done; while the above, in our opinion, by no means indicates what yet may be done. The execution of the prisoners taken does not afford good grounds of hope for future submission.

The reported shooting of Dr. L. C. Gunn, o Philadelphia, editor of the Sonora (California Herald, is not true. The San Francisco Herald, of the 1st of July, says the whole story is unfounded, one of the newspapers having been imposed upon. We are glad to see the contradiction. diction; there are acts of violence enough re-corded in California, without adding fictitious occurrences, to the disgrace of the country.

The California Courier estimates the annual yield of gold dust at \$134,660,000. This is undoubtedly exaggerated.

Maria's like a clock they say, Unconscious of her beauty;

If this be true, such self-comman Such well-directed powers, Of may her little minute hand Become a hand of ours!

Where are Mr. Paine and his water gas?

Mr. Paine is here, busy and hopeful as ever Mr. Faine is here, busy and hopeful as ever. Point of Law.—Blackstone, speaking of the right of a wife to dower, asserts, that if land abide in the husband a single moment, the wife shall be endowed thereof; and he adds, that the doctrine was extended very far by a jury in Wales, where the father and son were hanged at the same time; but the son was supposed to survive the father, by appearing to struggle the longest; whereby he became seized of an estate by survivorship; in consequence of which seizure his wife obtained a verdict for dower.

FEMALE DOCTORS .- Mrs. Sarah J. Hale, in FEMALE DOCTORS.—Mrs. Sarah J. Hale, in an article in Godey's Lady's Book for August, takes strong ground in favor of the practice of medicine by females. She says "there are a few self-evident propositions, and it would be questioning the common sense of mankind to doubt the general belief on these points. One is, that women are by nature better qualified than men to take charge of the sick and suffer-ing; a second, that mothers should know the best means of preserving the health of their children; and a third point is, that female phy-sicians are the proper attendants for their own sex in the hour of sorrow."

THE STEAM PROPELLER LAPAYETTE, under going repairs in New York, has been furnished with a coating of a composition formed of arsenic and other chemical ingredients destructive to insect life, and known as "Williams's Compound." It is intended to supersede the use of copper on the bottoms of vessels, and it is of copper on the bottoms of vessels, and it is said to prevent effectually the accumulation on them of barnacles, grass, &c. One of Zerega's vessels, the Arctic, is now on her return from the third voyage to Liverpool, having had but one application of the compound. Four steamships, the Marion, Pioneer, City of Pittsburg, and the Lafayette, are now coated with it.

New Bedford contributes a block of granite for the Washington Monument, with as a device the sculptured figure of a sperm whale wounded, with a lance and harpoon. The date "1851" is carved upon the body, and the whole device is well ornamented with scroll work. Over all appears the simple inscription, "New Bedford," in characters of appropriate magnitude.

Among the more recently arrived immigrants from England, at New York, are a large number of gypsies, from the neighborhood of Durham and Newcastle. They are at present encamped in the woods near Hoboken.

DEATH OF CHILDREN.—Those who have lost an infant are never, as it were, without an in-fant child. The other children grow up to man-hood and womanhood, and suffer all the changes of mortality; but this one alone is rendered an immortal child; for death has arrested it with kindly harshness, and blessed it into an eterna image of youth and innocence.

STEAM COMMUNICATION WITH GALWAY .- The preliminary steps in organizing a company for the establishment of steam communication be-tween New York and Galway have been taken by parties in this city. Subscription lists will be opened to the public in a day or two. The name the company assumes is the "New York and Galway Steamship Company."

Dr. Franklin, in summing up the domestic evils of drunkenness, says, "Houses without windows, gardens without fences, fields without tillage, barns without roofs, children without s, or manners

HORRID SPECTACLE .- A day or two since an intoxicated woman with a dead child in her arms was arrested in the streets of New York.

TO TAKE MILDEW OUT OF LINEN .- Take soap, and rub it well, then scrape some fine chalk, and rub that also into the linen; lay it on the grass; as it dries wet it a little, and the mildew will come out at twice doing.

Moses Weston moulded, for M. L. Childs, of South Hadley Falls, Mass., in eleven hours and a half, twenty-one thousand one hundred and sixty-two bricks. JUST So .- Of all actions of a man's life, says

Seldon, his marriage does least concern other people; yet of all actions of his life it is most meddled with by other people. The locomotive force on the New York and Erie Railroad amounts to one hundred and seventeen engines. The road, it is said, will require, when in full operation, two hundred lo-

comotives. "Doctor, do you think tight lacing is bad for the consumption?

"Not at all-it is what it lives on." It would certainly tend much to domestic comfort if modern chemistry, as applied to the arts, was taught our young ladies, instead of that superficial kind found in old receipt books.

When James II. insisted yery much on Lord -'s changing his creed, he replied: "Please your majesty, I am pre-engaged."

"How?"
"When last in Egypt, I promised the Bashaw f ever I changed my religion to become a Ma

Champfort said of the ancient government of France, "It is a monarchy tempered by songs! Southey said to a low-spirited friend, "Translate Tristram Shandy into Hebrew, and you will be a happy man."

A Good REASON.-Blitz had a bright little fellow on the stand to assist him in the "expe-

"Sir," said the Signor, "do you think I could put the twenty-cent pieces lady holds into your pocket?"

No," said the boy, confidently. " Think not ?" "I know you couldn't," said the little fellow

with great firmness. "Why not?"
"Cause the pockets is all tored out?"

A GENEROUS WORLD!—Coleridge says that no sooner does A. fall into difficulty than B. begins to consider what C. ought to do for him. SYDNEY SMITH said there were three things which every man fancied he could do-farm a small property, drive a gig, and edit a news-

THE CHOLERA. - A London paper gives late advices from the Island of Grand Canary, which state that out of a population of eight thousand, which the island contains, at least three thou-said have perished of cholers.
